

DHEC Vital Records Renovation Anderson, South Carolina

As part of a statewide DHEC Vital Records restructuring and modernization, Design South assisted Anderson County with the interior renovation of their local branch office. With increasing service demand, additional space was required. Due to space constraints, an adjacent office space was absorbed into the Vital Records footprint to allow for greater seating capacity in the waiting area. An additional service window was incorporated to increase productivity and efficiency. With new wood veneer paneling, glazing, and casework the customer service area was renewed and refreshed.
