

# Preliminary Evaluation Near School District Five's New Elementary Schools

After construction of two new elementary schools, Anderson County officials proactively examined the adequacy of the road system in and around the area of both school sites. The current construction of many of the roads was below collector roadway standards.

## Scope:

- This report identified probable improvement costs to roads and intersections in order to meet County Standards for collector roads.
- The study identified \$2.2 million in necessary improvements to make immediate significant road and intersection improvements.
- Another \$4.8 million in improvements was identified for supplementary, but necessary, road and intersection augmentation.
- The supplementary improvements will be required as the schools influence the growth of the surrounding area with new subdivisions and like changes in land use.
