

# Energy Provider Operator Training Center Renovation Oconee, South Carolina

Design South Professionals was tasked with a renovation and expansion of a training facility for a major energy provider in Oconee County, South Carolina. The renovation consisted of creating better functionality among classrooms and training environments. This included the removal of offices to create a large classroom that can be separated into two smaller classrooms. Other work included updating existing classrooms with modern finishes and updated Audio/Visual equipment. Classroom restrooms, exam rooms and exam storage were also incorporated into the renovation.

Contractor	McCrary Construction 555 N. Pleasantburg Drive Suite 107 Greenville, SC 29607
Building Size	45,500 sf Renovation
Project Cost	\$284,600
