

# Electric Cooperatives of SC Cayce, South Carolina

Design South Professionals was commissioned to renovate the kitchen and create a space relative to the board room that could serve as dining room for catered conferences. The kitchen was renovated to include all new finishes, upgraded appliances and a custom island for serving needs.

With the kitchen being located off of the board room, the ideal location for the dining room was the existing covered patio accessed through the breakroom. By extending and enclosing the patio, it creates a natural flow from the conference room into the breakroom and then to the dining room. The dining room features functioning industrial garage door windows, new finishes, and a projector to allow for a smaller conferencing option.

Client Reference	ECSC Mike Couick 808 Knox Abbott Drive Cayce, SC 29033
Contractor	Hood Construction 1050 Shop Rd, Suite A Columbia, SC 29201
Building Size	375 sq ft Kitchen Renovation  1,100 sq ft Dining Addition
