

Hospice of the Upstate Anderson, South Carolina

Design South Professionals developed plans for a new 7,900 square foot, three-story Community Outreach Center in conjunction with a new 6,950 square foot, one-story Education and Volunteer Center.

The Community Outreach Center which includes office space for counseling, fundraising and community outreach is designed to mimic the imagery of the old farmhouse that once stood on the property. It also includes storage rooms, reception/foyer, parlor, restrooms, media center, stairs, and elevator. The Education/Volunteer Center is connected to the Community Outreach Center on the first floor and includes a state-of-the-art presentation and audio-visual system, a 200-seat (at tables) meeting/work room, lobby, restrooms and catering kitchen.
