

Energy Provider Operator Training Center Expansion

Oconee, South Carolina

The expansion of the Operating Training Center consists of a two story 18,000 square foot building connected to the renovation by a 30 foot sky bridge. The new facility provides private offices, classrooms that include modern audio visual equipment (projectors, retractable screens, retractable window shades, smart boards), video conference and training rooms, open offices for cubicles, quiet studies, and document storage. The video conference room and training rooms are equipped with smart technology and integrated audio visual equipment. In addition to the new expansion, a new entrance drive and adequate parking were also incorporated into the project.
