

# Simpsonville Carwash

## Simpsonville, South Carolina

Creative Builders approached Design South Professionals to develop plans for a 3,900 square foot carwash on Harrison Bridge Road. This carwash is fully equipped with a 126-foot-long tunnel, an office, restroom, locker and equipment room. The exterior façade is made up of painted stucco and split face CMU with two continuous painted bands around the building. The building also features aluminum awnings and stucco cornices paired with wall mounted and goose neck lighting. Prefabricated aluminum signs are to be located on the front and sides of the building and are to be determined by the owner at a later date.
