

Stormwater Master Plan Update Clemson University

Design South was retained to evaluate and update Clemson University's existing Campus-wide Stormwater Master Plan. Review of the existing information revealed that the current master plan had a heavy emphasis on stormwater modeling and needed to be updated to bring the University into compliance with the new Municipal Separate Storm Sewer System (MS4) regulations.

Scope:

- Review of existing stormwater plan
- Review of NPDES Municipal Separate Storm Sewer System (MS4) Permit
- Development of a comprehensive Stormwater Master Plan for Clemson University's Main Campus in anticipation that Clemson University will be designated an MS4
- Preliminary development and Stormwater Master Plan deployment

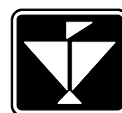

The Project: Document Review
Preliminary Planning
Master Plan Update
Municipal Separate Storm
Sewer System Programming

Contract Value: Phase 1: \$26,300
Phase 2: Proposed \$85,000

Contract Period: Phase 1: 180 Days
Phase 2: Proposed 270 Days

Principal Contractor: N/A
